

Aerial Work Platform

Aerial Work Platforms - There are many attachments for forklifts which could be utilized so as to help expand the capabilities of your lift truck and allow you to carry things, handle materials with less effort or to accomplish clean-up tasks.

Several accessories were specifically meant for the forks themselves. For instance, fork extensions are used whenever you require much more blade length, which increases lifting capability. Blade extensions come in lengths ranging from 48-120 inches. Triangular or rounded attachments are another type utilized if transporting rolled material to be able to make sure it does not roll off of the typical flat blades.

Examples of lifting accessories comprise pivoting and telescoping boom or crane accessories. They can come in several various kinds and are most often designed for transferring lumber, poles, metal bars and different sort of bulky stuff. Additional accessories like for instance different styles of hooks and hook plates are offered so as to carry things utilizing a chain or sling. Slab lifters and magnetic lifters are other items which could be utilized together with hook accessories. Slab lifters are specialized accessories which are designed for picking up a variety of materials which are delivered in a sheet or slab format. Carpet poles and rug rams are other lifting tools which connect to your forklift to be able to make transporting rolls of carpet easier. The attachment hooks onto the forklift's forks and has a pole which goes through the middle of the carpet roll.

There are numerous other kinds of forklift accessories which can be designed for facility maintenance like snow blades. These forks connect to front end loaders and can move materials like dirt, soil and snow. Other common cleanup attachments consist of magnetic sweepers and standard sweepers. Standard sweepers includes a broom that the lift truck forks hook onto for sweeping large spaces like warehouse, factory floors and parking lots. The magnetic sweeper is the same except that it has a magnetic plate rather than bristles. The magnetic sweeper is utilized in places where there is lots of metal fragments such as on shop floors for example. Sweepers have widths as much as 60 inches and this surface area makes clean up quick and easy.

A material spreader is one more lift truck attachment that is usually utilized at facilities. These spreaders are helpful for a range of applications like for instance spreading ice melt, rock salt, pellets, seeds, fertilizers, insecticides and seed.

Work platforms are another optional lifting attachment which numerous companies utilize everyday. The platforms range in size from 36" x 36" to up to 60" x 60". There are several models presented which are capable of folding up and storing into a smaller space. Work platforms are designed to raise employees up to an overhead location making use of the forklift. Larger platform units have extra space for personnel in order to bring tools and other necessary objects meant for the task. Often work platforms are constructed of poly material or steel.
